SUMMARY

Through any situation, if taught properly I will follow and respect rules as well as put my best foot forward in my work and work ethic. I have a passion for the environment as well as science as a whole and would love nothing more than to go forward in each field and look for new opportunities to learn. I have lots of experience with the environment and have worked lots of part time jobs since I was 15, but more recently a couple of years with slightly higher stressed situation handling as well as being given better responsibilities within work. Am willing to work hard and learn new skills and contribute to a team environment and lead in the right direction if needed.

EDUCATION AND TRAINING

Bachelor of Arts: Geography and Geographic Information Systems

University of South Florida Expected in Dec 2023

Tampa, FL

Associate of Arts: General Studies

Hillsborough Community College Dec 2020

Tampa, FL

- Research: Economics and Geography.
- Research: Nightlife in Tampa and Channelside through Urban Planning Courses. And through data collecting while interviewing lots of people in the area.
- Additional Coursework in Research Methods and Fieldwork.
- Additional Coursework in Field Methods through River sampling and substrate classification through microscopes in order to determine the health of a somewhat aquatic environment. (Dried out riverbed at the time).
- Data collection of a couple wetlands by classifying flora and fauna as well as determining where the wetland ends and begins based off of tree waterlines, tree height, and soil sample taking throughout the area.
